VK-FPL-Z Automatic Folding Cardboard Corrugated Carton Box Labeling Machine

VK-FPL-Z is a modified design based on VK-FPL. It is specially designed for large folding corrugated boxes. The machine is equipped with a wider carton feeding device and conveyor belt. You only need to manually place the stacked cartons into the feeding station, and the machine will automatically separate each carton and enter the labeling station one by one to complete the labeling. Reduce the fatigue of workers; add an automatic material receiving mechanism to collect cartons into stacks, which is convenient for workers to take away.
